

CALL FOR PAPERS:

WASA-NGI-VI -

6th Int. Workshop on Architectures, Services, and Applications
for the Next Generation Internet

Collocated with IEEE LCN 2013 in Sidney, Australia

October 24, 2013

<http://ipvs.informatik.uni-stuttgart.de/vs/wasangi6/>

WORKSHOP SCOPE

The 6th Workshop on Architectures, Services and Applications invites researchers and practitioners to share their ideas on novel network architectures and services to support emerging data-intensive Internet applications. The workshop focuses especially on architectures and services that expose high flexibility for scaling applications and also provide efficient processing of data streams. This includes all aspects related to QoS, mobility, heterogeneity, and interoperability while employing the possibilities of novel communication technologies such as content-centric and software-defined networking.

WORKSHOP TOPICS

The workshop solicits contributions regarding novel and possibly preliminary research results related, but not limited to the following list of topics:

- * Novel data-intensive Internet applications and their requirements for Future Internet architectures and services
- * New Internet architectures and services enabling scalable and flexible deployment of data-intensive Internet applications, e.g., content-centric networking
- * Elastic functions and supporting data distribution networks, e.g., using server and/or network virtualization and software-defined networking
- * Peer-to-peer and service overlay networks for building communication services with support for QoS, mobility, heterogeneity, and interoperability
- * Communication paradigms and models for data intensive computing, e.g., event processing, publish/subscribe, map reduce, group communication
- * Solutions for data-gathering over heterogeneous network technologies, e.g., global sensor networks, delay-tolerant networks and so on

SUBMISSION GUIDELINES

Papers should be submitted in PDF format via the workshop page. Contributions should present novel and possibly preliminary research results (up to 8 camera-ready pages in 10 pt IEEE format).

Each submission will be reviewed by three members of the program committee. Papers are selected according to their originality, quality, and relevance to the workshop topics. Accepted papers will appear in the LCN Workshop proceedings and will be published within the IEEE digital library. For accepted papers, at least one author must register for the workshop and give a presentation at the workshop.

IMPORTANT DATES

Submission deadline: 05/12/2013

Author notification: 06/30/2013
Camera-ready version: 07/30/2013
Registration deadline: TBA

ORGANIZATION

Co-Chairs

Roland Bless (Karlsruhe Institute of Technology, Germany)
Boris Koldehofe (Universität Stuttgart, Germany)
Oliver Waldhorst (Karlsruhe Institute of Technology, Germany)
